STARLITE II

POA TRIVIALIS

STARLITE II
POA TRIVIALIS

IMPROVED PUTTING – SMOOTHER TRANSITIONS

- IMPROVED PUTTING SURFACE
- READILY ESTABLISHES
- INCREASED SHOOT DENSITY
- DARKER GREEN
- SMOOTHER TRANSITIONS

Starlite II is an improved poa trivialis principally intended for dormant bermudagrass overseeding. It was bred to produce a denser, finer textured, more upright plant that would accommodate very close mowings. These features contribute to a tighter, cleaner cut playing surface for truer faster putts.

Starlite II is darker in color for better compatibility and uniformity with leading overseeding ryegrasses. It will also establish in cooler winter temperatures. As temperatures rebound in late spring, Starlite II is less competitive with bermudagrass regrowth, and more easily transitions out.

In cool season areas Starlite II, alone or in mixtures, provides very good cover in moist shaded areas.

TURF PERFORMANCE

	QUALITY	COLOR	DENSITY
Starlite II (•)	**7.3**	**7.0**	**7.7**
Starlite	6.4	6.3	6.3
Laser	6.3	6.7	6.7
Sabre 3	5.7	5.3	7.0
Sun-up	4.3	5.3	4.7
LSD	0.8	1.1	1.1

Denotes top LSD group

Denotes range measured 0-100%, 100 = Complete Coverage.

Private trial, Jefferson, OR. 09-10 data.
9 = best parameter measurement. Selected varieties including highest to lowest.
